

SECRETNPIC/D-202-62
19 November 1962**MEMORANDUM FOR:** Director of Central Intelligence**SUBJECT:** High Altitude Photo Coverage of Cuba
During the Period 15 to 18 November
1962

1. In response to a telephoned instruction from the DDCI we have hastily compiled the attached map showing the collective tracks covered by ten high altitude photo missions between 15 November and 18 November 1962 inclusive.

2. You will immediately note that this is track over ground coverage alone and does not indicate how much was obscured by clouds. Weather has not been good and the attached table would show that the ten missions added only 10% to the cumulative cover of the island of Cuba.

3. The frame by frame plotting of ground covered by unobscured photography is a long, time consuming process which we have not been able to do in the time available.

4. As a matter of background information it might be of interest to you to note that during the period 14 October to the present we have had approximately 70 high altitude missions.
